PE Electrofusion Saddles

Saddles require specific tooling (and experience) to install. If you are unfamiliar with requirements please contact Hynds Water

EF Modular T Saddle SDR11 PN16 Georg Fischer

GF Modular tapping saddles allow you to mix and match the saddle with the right tapping tee. Simply select the main pipe size from table A and the desired outlet from table B. Assemble the saddle to the pipe, insert tapping tee, point the outlet in the right direction and then weld. One weld operation secures both the saddle and the tapping tee. (Top Load means top load tool required for installation)

NOTE: Please select a pipe saddle from list A and a tapping Tee from list B.
